pursuit of excellence as their primary goal. Why then has the quality approach, developed and popularized in industry, and how increasingly applied in health care and government, receiving so much attention in higher education at this moment? What does this perspective add to the approaches to excellence with which they have long embraced? These are the two primary questions that this book seeks to address. Chapters and contributors include: "The New Productivity" by Peter F. Drucker; "World War II and the Quality Movement" by J. M. Juran; "The Quality Approach to Higher Education: Context of Concepts for Change" by Brent Ruben; "The Big Questions in Higher Education Today" by L. Edwin Coate; "An American Approach to Quality" by Marilyn R. Zuckerman and Lewis J. Hatala; "Quality in Higher Education: Critical Issues in Definition and Assessment" by Brent Ruben; and "Ten Areas for Future Research in Total Quality Management" by A. Blanton Godfrey. The volume is graced with an opening essay by Francis L. Lawrence, president of Rutgers University. Higher education is in the public spotlight today due to the many challenges it now faces: rising tuition costs; frustration about a tight job market for graduates; calls for increased faculty productivity; concerns about political correctness; and criticisms regarding the use of grant and research funds, among others. Quality in Higher Education is a particularly timely book that will greatly benefit educators, university administrators, students, and sociologists, and all those who are interested in higher education today.

Quality Management Implementation in Higher Education: Practices, Models, and Case Studies

Quality Assurance in Higher Education This title was first published in 2001. Universities in developing countries have followed their counterparts in developed countries and adopted quality assurance to improve the quality of their activities. This text examines the wisdom of such a move when many of the conditions necessary for its success are not present. It concludes that quality assurance can be useful in developing countries because it shows how a university's seemingly disparate activities are related to one another to serve a common goal and how the quality of these can be improved by using an integrated approach. Quality assurance also provides more focus and direction to the work of the traditional university system. However, it must be modified to suit the conditions prevailing in developing countries by being simple in design, modest in expectations and realistic in requirements.

Introduction to Total Quality Management in Higher Education

Handbook of Research on Operational Quality Assurance in Higher Education for Life-Long Learning Through a series of vignettes, this volume of New Directions for Institutional Research provides valuable insights into the experiences of colleges and universities that are applying the principles of Total Quality Management (TQM) to higher education. Each vignette presents a different aspect of TQM regarding issues of organization, training, use of tools or methodologies, the language of TQM, or the challenges in transforming organizational cultures. Many vignettes conclude with a synopsis of the lessons learned. This is the 78th issue of the quarterly journal New Directions for Institutional Research. For more information on the series, please see the Journals and Periodicals page.

Quality Management Principles and Policies in Higher Education Although initially utilized in business and industrial environments, quality management systems can be adapted into higher education to assess and improve an institution's standards. These strategies are now playing a vital role in educational areas such as teaching, learning, and institutional-level practices. However, quality management tools and models must be adapted to fit with the culture of higher education. Quality Management Implementation in Higher Education: Practices, Models, and Case Studies is a pivotal reference source that explores the challenges and solutions of designing quality management models in the current educational culture. Featuring research on topics such as Lean Six Sigma, distance education, and student supervision, this book is ideally designed for school board members, administrators, deans, policymakers, stakeholders, professors, graduate students, education professionals, and researchers seeking current research on the applications and success factors of quality management systems in various facets of higher education.

Quality Assurance in Higher Education To help address the challenges of sustainable development, higher education institutions must transform themselves, bringing together best practice in quality management for tertiary education with best practice in education for sustainable development. This book provides tested strategies and pathways for undertaking this successfully.

Handbook of Research on Quality Assurance and Value Management in Higher Education Quality Assurance is not a new concept in the education sector in general, and higher education in particular, though it is becoming increasingly more relevant and important. Higher education helps to improve an individual's quality of life by enabling them to inflate their knowledge and expertise, to grasp abstract concepts and theories, and to raise their awareness of the world and their community, and as such the assurance of quality is becoming more pivotal in the whole education process. There is no simple definition of the concept of quality in education, though numerous models and theories have been devised. Toward Quality Assurance and Excellence in Higher Education is a new episode of the Quality Assurance perception in higher education, which identifies the quality culture and orientation from the beginning, integrating crucial factors to build a "pyramid" of higher education excellence. The book compares concepts from the main theories of Quality Assurance, management and control when they are...
Quality Management in Higher Education

Previously, key levers of higher education have seemed to be the learning organization, work-integrated learning for life-long learning, and learner-centered pedagogy. However, funding evolution and the integration of digital tools are changing professional styles and learning behaviors. Nonetheless, the sustainability of higher education requires quality agreement based on ethical, robust, and replicable pedagogical approaches. The Handbook of Research on Operational Quality Assurance in Higher Education for Life-Long Learning is a comprehensive scholarly book that focuses on the evolution of the education framework and job market as well as necessary changes needed in organizations to reply to life-long learning and competency-based training initiatives. Highlighting topics such as digital environment, e-learning, and learning analytics, this book is essential for higher education faculty, managers, deans, professionals, administrators, educators, academicians, researchers, and policymakers.

Quality Assurance In Higher Education

Total Quality Management in Higher Education

This volume works towards overcoming the lack of systematic impact evaluation in higher education, particularly analyses which are not restricted to ex-post gathered data and expert assessments. Since (higher) education is more important than ever in knowledge societies, high priority should be ascribed to quality management (QM) in higher education institutions (HEIs). Consequently, impact evaluation of QM effectiveness is indispensable because it generates the knowledge required for quality (management) improvement. The introductory chapter elucidates the motivation and objective of impact analyses of QM in HEIs and provides an overview of the volume’s other contributions. One chapter reflects on success factors and un-/intended effects of QM, while another one analyses more discursive ways of evidence-informed guidance of QM policies which are complementary to rigorous impact studies. Five chapters investigate QM effectiveness in HEIs by ex-post and simultaneous impact evaluation in European case studies, including assessments of students, teachers, quality managers, and institutional leadership. The case studies comprise universities from Germany, Spain, Finland, and Romania. The final chapter reports a SWOT analysis of impact evaluation of QM in HEIs, which is suggested as a tool for bridging the notorious gap between the demanding methodology of impact evaluation and its proper implementation. This book was originally published as a special issue of the European Journal of Higher Education.

Toward Quality Assurance and Excellence in Higher Education

Quality Management in Higher Education This book offers a conceptual, theoretical, and empirical overview of the role of total quality management (TQM) in Indian higher education from the perspectives of the engineering faculty, students, and alumni. It identifies the critical dimensions to measure the performance of TQM. This volume conceptualizes the service quality of higher education, especially in engineering education, through empirical assessment of the services being provided to major stakeholders like the faculty, the students, and the alumni. It highlights the significance of TQM in creating success stories while discussing the importance of improved productivity and quality in higher education with respect to the quality of engineering educational institutions. Further, the book provides a complete framework for the implementation of TQM in engineering educational institutions. This book will be of interest to students, teachers, and researchers of education and management studies. It will also be useful for educationalists, education administrators, education policymakers and bureaucrats, management professionals, business leaders, and the governing bodies of higher education institutions.

Process Management in Universities This book weighs up the consequences of introducing Quality Enhancement and Risk Management as new dimensions in Higher Education quality control on a global scale. The authors include Chief Executive Officers of Quality Agencies, policy analysts and leading scholars in Quality Evaluation and Comparative Higher Education policy analysis.
